

**? Where can you readily find an additional 50-250 basis points in risk-adjusted performance ?**

**It's a lot simpler than you think**

*forward look, inc.* enables investment managers to identify and resolve potential shortfalls in portfolio performance. Our technique measures the effectiveness of the manager's operations in delivering the full value inherent in their strategies and products. Using proprietary analytics, our RiskForecast™ service generates forward-looking, multi-factor profiles that yield an incisive 'look-through' at the quality of the manager's operations. Optimized investment operations can return risk-adjusted performance gains ranging from 50 to 250 basis points.
