

? Are you missing out on 50-250 basis points in performance due to the quality of your manager's investment operations ?

forward look, inc. enables plan sponsors, foundations, endowments and their consultants to expand their fiduciary capabilities by forecasting potential shortfalls in performance by their investment managers. We provide investors with an unbiased technique for identifying and retaining those managers whose investment operations can deliver the full value inherent in their investment ideas. Using proprietary analytics, our RiskForecast™ service generates forward-looking, multi-factor profiles that yield an incisive 'look-through' at the quality of a manager's operations. Optimized investment operations can return risk-adjusted performance gains ranging from 50 to 250 basis points.
